# TIMESCO R™

## RECHARGERS

### BATTERIES

An innovative, intelligent Lithium charger for use with all Timesco rechargeable engines. Both sides of the charger have end panels that can be quickly removed to expose the unique connector plates. These connector plates allow up to 3 chargers to be daisy chained together delivering power through all chargers equally only using one transformer.

We have also developed Lithium ION batteries that are fully compatible with this new charger and can be used in our existing metal laryngoscope handles; Xenon, XLED, Orion and in our Orion and Optima diagnostic handles. Batteries are available in medium C and small AA sizes.

Once engines are fully charged the recharger will switch to a low power mode to avoid using unnecessary electricity.

Only the engine is inserted into the charger, reducing the risk of cross contamination from a handle to the charger.

A fully charged Timesco R Engine Medium (C Size) will last approx. 2 hours.

The ION-R charger (single and daisy chained) takes approx. 4 hours to fully charge batteries for medium handles.

Side plates can be removed to daisy chain 3 chargers together to receive power from a single power supply.

The colour changing LED indicates the health of the battery and the charging cycle. A yellow light indicates testing and a green light indicates fully charged batteries.

## PRODUCT SPECIFICATION

 CE marked

 Latex free

 Extensive guarantee

Supplied with multilingual instructions  
[IL022/2](#)

**89/336/EEC**

Electromagnetic compatibility directive (as amended)

**73/23/EEC**

Low voltage directive (as amended)

## TIMESCO ION-R RECHARGERS

Product Code	Description
3125.999.10	Timesco ION-R Charger (Single) Includes: Charger, power supply and both Timesco R inserts (AA and C)
3125.999.20	Timesco ION-R Charger (Dual) Includes: 2 x Chargers, 1 x power supply and 2 x each Timesco R inserts (AA and C)

Timesco ION-R Rechargers are multi voltage and are supplied with accessories for operation worldwide.

Battery for  
Small Handles

Battery for  
Medium Handles

Only the Timesco R Engine is inserted into the charger.

Both the small and medium Timesco R Engines can be charged in the single and double chargers.

Timesco R Engines can be fully charged in approx. 4 hours.

The colour changing LED indicates the health of the battery and the charging cycle.

Side plates can be removed to daisy chain 3 chargers together to receive power from a single power supply.

Once Timesco R Engines are fully charged the recharger will switch to a low power mode to avoid using unnecessary electricity.

## TIMESCO R BATTERIES

Product Code	Description
3115.150.20	Timesco R Engine Small (AA Size) 2.5V
3115.150.50	Timesco R Engine Medium (C Size) 2.5V

Only one battery required per handle. Timesco supply small and medium rechargeable batteries to help you create a rechargeable system.
